General Information

Corporación América Airports S.A. (the “Company” or “CAAP”) is a holding company primarily engaged through its operating subsidiaries in the acquisition, development and operation of airport concessions. The Company and its operating subsidiaries are collectively referred to hereinafter as the “Group”.

The Company was formed as a private limited liability company under the laws of the Grand Duchy of Luxembourg on December 14, 2012. The Company is ultimately controlled by Southern Cone Foundation (“SCF”), a foundation, organized under the laws of the Principality of Liechtenstein. The address of its registered office is in Vaduz.

The Group currently has operations in Argentina, Brazil, Uruguay, Armenia, Italy, Ecuador and Perú.

A list of the principal Group’s subsidiaries is included in Note 2 of the Consolidated Financial Statements as of December 31, 2017.

Company conversion

The Company was converted on September 14, 2017, from a Luxembourg Limited Liability Company named A.C.I. Airports International S.à r.l. (“ACI”) into a Luxembourg Corporation and changed its name to Corporación América Airports S.A. (the “Conversion”). In conjunction with the Conversion, all of the Company’s outstanding equity interests were converted into one billion five hundred million (1,500,000,000) shares of common stock which were held by ACI Airports S.à r.l. (controlling shareholder). In connection with the Conversion, Corporación América Airports S.A. has continued to hold all assets of ACI and has assumed all of its liabilities and obligations.

The main adjustment of the Conversion principally gave effect to the recognition of the share capital of Corporación América Airports S.A. for a total nominal value of USD 1,500 million (USD 1 per share) and the elimination of the shares of A.C.I. Airports International S.à r.l. for a total amount of USD 20 thousands and of the Free distributable reserves for a total amount of USD 1,499.9 million.

A detailed explanation of movements of share capital that have occurred in 2018, including reverse stock and Initial Public Offering, are included in Note 14.

These condensed consolidated interim financial statements have been approved for issuance by the Company on August 22, 2018.

2 Basis of presentation and accounting policies

The principal accounting policies applied in the preparation of these Condensed Consolidated Interim Financial Statements are consistent with the Consolidated Financial Statements ended at December 31, 2017. These policies have been consistently applied to all the years presented, unless otherwise stated.

2 Basis of presentation and accounting policies (Cont.)

2.1 Basis of presentation

These Condensed Consolidated Interim Financial Statements have been prepared in accordance with IAS 34, “Interim Financial Reporting”. The accounting policies used in the preparation of these Condensed Consolidated Interim Financial Statements are consistent with those used in the audited Consolidated Financial Statements for the year ended December 31, 2017, except for changes explained in Note 2.2. These Condensed Consolidated Interim Financial Statements should be read in conjunction with the audited Consolidated Financial Statements for the year ended December 31, 2017, which have been prepared in accordance with International Financial Reporting Standards (“IFRS”) of the International Accounting Standards Board (IASB) and the Interpretations of the International Financial Reporting Interpretations Committee (IFRIC).

Elimination of all material intercompany transactions and balances between the Company and the other companies and their respective subsidiaries have been made.

The preparation of Condensed Consolidated Interim Financial Statements in conformity with IFRS requires management to make certain accounting estimates and assumptions that might affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the reporting dates, and the reported amounts of revenues and expenses during the reporting years. Actual results may differ from these estimates.

In the preparation of these Condensed Consolidated Interim Financial Statements, the significant areas of judgment by management in the application of the Group’s accounting policies and the main areas of assumptions and estimates are consistently as those applied in the Consolidated Financial Statements for the year ended December 31, 2017.

Assets and liabilities are classified as current if settlement is expected within 12 months.

There were no changes in valuation techniques during the period, except for changes explained in Note 2.2, and there were no changes in risk management policies since the end of the year ended December 31, 2017.

2.2 Changes in the accounting policies

The group has applied the following standards and amendments for the first time for their quarter reporting period commencing January 1, 2018:

IFRS 9, “Financial Instruments”

The group has adopted IFRS 9 as issued in July 2014, which resulted in changes in accounting policies and adjustments to the amounts recognized in the Consolidated Financial Statements for the year ended 31 December 2017.

This standard replaces the previously issued versions and establishes new requirements for hedge accounting and a new model of impairment for financial assets, effective from January 1, 2018.

The new impairment model requires the recognition of impairment provisions based on expected credit losses (ECL) rather than only incurred credit losses, as is the case under IAS 39.

The accounting policies were changed to comply with IFRS 9 as issued by the IASB in July 2014.

IFRS 9 replaces the provisions of IAS 39 that relate to the recognition, classification and measurement of financial assets and financial liabilities; derecognition of financial instruments; impairment of financial assets and hedge accounting. IFRS 9 also significantly amends other standards dealing with financial instruments such as *IFRS 7 Financial Instruments: Disclosures*.

2 Basis of presentation and accounting policies (Cont.)

2.2 Changes in the accounting policies (Cont.)

As permitted by the transitional provisions of IFRS 9, the Group has elected not to restate comparative figures.

Adjustment to retained earnings from adoption of IFRS 9	<u>2,356</u>	<u>542</u>
Opening balance – IFRS 9	<u>140,390</u>	<u>335,901</u>

Interest income from these financial assets is included in finance income using the effective interest rate method.

2 Basis of presentation and accounting policies (Cont.)

2.2 Changes in the accounting policies (Cont.)

- (ii) Fair value through other comprehensive income ("FVOCI"): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.
- (iii) Fair value through profit or loss ("FVPL"): Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognized in profit or loss and presented net within other gains/(losses) in the period in which it arises.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

IFRS 15, "Revenue from contracts with customers"

IFRS 15, 'Revenue from contracts with customers' deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers.

Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 'Revenue' and IAS 11 'Construction contracts' and related interpretations. The Company's management has determined that the adoption of this standard did not have a significant impact on the Company's financial condition or results of operations.

Effective January 1, 2018, the Group adopted this standard using the modified retrospective adoption approach. There was no impact on the condensed consolidated interim financial statements and no cumulative effect adjustment was recognized.

There were no other changes on accounting policies and accounting methods. The standards that are mandatory effective on or after January 1, 2018 were applied by the group.

New and amended standards not yet adopted for CAAP.

Certain new accounting standards and interpretations have been published that are not mandatory for June 30, 2018 reporting periods and have not been early adopted by the group. The group's assessment of the impact of these new standards and interpretations is set out below.

IFRS 16, "Leases"

In January 2016, the IASB issued IFRS 16, "Leases", which will result in almost all leases being recognized on the balance sheet, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognized. IFRS 16 must be applied on annual periods beginning on or after January 1, 2019. The Company's management is currently assessing the potential impact that the application of this standard may have on the Company's financial condition or results of operations.

2 Basis of presentation and accounting policies (Cont.)

2.2 Changes in the accounting policies (Cont.)

New and amended standards not yet adopted for CAAP (Cont.)

Other standards and interpretations non-significant for the Company's financial statements:

- Amendment to IFRS 2 - Classification and Measurement of Share-based Payment Transactions -Annual Improvements to IFRS 2014-2016 cycle.
- IFRIC 22 - Foreign Currency Transactions and Advance Consideration.
- IFRIC 23 - Uncertainty over Income Tax Treatments.

There are no other standards that are not yet effective and that would be expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

3 Segment information

Operating segments are components of an enterprise where separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision-making group, in deciding how to allocate resources and in assessing performance. The Group's chief operating decision maker is its Board of Directors. The Group's operating segments are managed separately because each operating segment represents a strategic business unit providing airport and non-airport services ("others") to clients in different countries. The Group's reportable operating segments are the seven countries in which the Group currently operates, which are Argentina, Brazil, Uruguay, Armenia, Ecuador, Italy and Peru.

Within each reportable segment, the Group develops and operates airport concessions ("Airports") and provides other services not directly related to airport concessions ("Others").

Assets, liabilities and results of sub-holding and/or holding companies are not allocated and are reported within the "Unallocated" column. This column also includes head office and group services.

The elimination of any intersegment revenues and other significant intercompany operations are included in the "Intersegment Adjustments" column.

The information regarding the Company's reportable operating segments is consistent with the information presented in Notes 2.U and 4 included in our audited Consolidated Financial Statements for the year ended December 31, 2017 and should be read in conjunction with them.

The performance of each reportable segment is measured by its adjusted EBITDA, defined, with respect to each segment, as net income before financial income, financial loss, income tax expense, depreciation and amortization for such segment. The Adjusted EBITDA for the Brazil segment does not exclude the amortization of the intangible asset related to the fee payable to the Brazilian government for the operation of the Brazilian airport concessions.

Effective April 1, 2018, the CODM revised the current segment reporting to also include another metric of performance. In addition, the CODM considers each reportable segment's Adjusted EBITDA before Construction Services margin as a relevant performance measure. Prior periods information have been revised to conform to the current period presentation.

Adjusted EBITDA excluding Construction Services is defined, with respect to each segment, as net income before construction services revenue, financial income, construction services cost, financial loss, income tax expense, depreciation and amortization for such segment. The Adjusted EBITDA excluding construction services revenue and construction services cost for the Brazil segment does not exclude the amortization of the intangible asset related to the fee payable to the Brazilian government for the operation of the Brazilian airport concessions.

IAS 29 requires that the financial statements of entities whose functional currency is that of a hyperinflationary economy to be adjusted for the effects of changes in a suitable general price index and to be expressed in terms of the current unit of measurement at the closing date of the reporting period, regardless of whether they are based on the historical cost method or the current cost method. Accordingly, the inflation produced from the date of acquisition or from the revaluation date, as applicable, must be computed in the non-monetary items.

In order to conclude on whether an economy is categorized as hyperinflationary in the terms of IAS 29, the standard details a series of factors to be considered, including the existence of a cumulative inflation rate in three years that approximates or exceeds 100%. Considering that inflation has increased significantly during 2018, it is expected to exceed the 100% three-year cumulative inflation rate, and that the rest of the indicators do not contradict the conclusion that Argentina should be considered a hyperinflationary economy for accounting purposes, the Group understands that there is sufficient evidence to conclude that Argentina is a hyperinflationary economy under the terms of IAS 29 as from July 1, 2018, and, accordingly, it will apply IAS 29 as from that date in the financial reporting of its subsidiaries and associates located in Argentina.

The restatement criteria of the financial information established in IAS 29 has not been applied in these Condensed Consolidated Interim Financial Statements.

There are no other subsequent events that significantly affect the Company's financial position as of June 30, 2018.
