- (1) Note that preliminary passenger traffic figures for Ezeiza Airport, in Argentina, for 2019 as well as January 2020 were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.
- (2) Preliminary data on 750 flights in August, 873 flights in September, 547 in October, 423 in November, 280 in December 2019, 1,256 in January and 195 in February 2020 at Brasilia Airport, due to delays in the submission of information by third parties. Moreover, starting November 2019 the Company has reclassified its passenger traffic figures for Brasilia Airport between international, domestic and transit retroactively since June 2018 to return to the count methodology utilized until May 2018. Notwithstanding, total traffic figures remain unchanged.
