(1) Note that preliminary passenger traffic figures for 2019, as well as January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January 2019 to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Passenger Traffic Overview

Total passenger traffic in September 2021 grew 2.3x compared to the same period of last year, driven by increases across all countries of operations, particularly in Argentina, reflecting easier comparisons due to tougher travel restrictions in the year ago period. When compared to 2019, overall passenger traffic declined 47.7%, impacted by the COVID-19 pandemic, though consistently improving from the decline of 75.7% recorded in April. International and domestic passenger traffic dropped 62.7% and 41.4%, respectively, from pre-pandemic levels of September 2019.

In Argentina, total passenger traffic increased 30.1x YoY. Against September 2019, overall passenger traffic declined 64.6%, with international passenger traffic decreasing 89.1%, impacted by tight government restrictions to international flights, including a limit of 1,700 arriving international passengers per day for most part of the month, while borders remained closed to non-resident foreigners, with limited exceptions. Domestic passenger traffic, which currently has no restrictions, declined 53.4% compared to 2019, improving sequentially from the decline of 63.3% recorded in August.

In Italy, where the recovery continued throughout the year, passenger traffic grew 87.2% YoY. Passenger traffic against September 2019 declined 47.7%, much in line with traffic levels reported in August, which benefited from the summer season in the region. International passenger traffic continued to improve sequentially, decreasing 53.7% in September 2021 against September 2019, whereas domestic traffic stood at almost 80% of pre-pandemic levels.

In Brazil, total passenger traffic was up 69.4% YoY. Compared to the same month in 2019, overall passenger traffic declined 19.7%, showing a continued improvement from the 69.1% drop posted in April 2021, reflecting better sanitary conditions in the country, advanced vaccination roll-out and increased passenger demand.

Total passenger traffic in Uruguay increased 3.9x YoY. When compared to the same month of 2019, passenger traffic was down 70.9% but continued improving sequentially, benefiting from the partial opening of borders, effective September 1. According to government announcements, starting November 1, 2021, borders will fully re-open to all foreigners who present a full vaccination certificate and a negative Covid test.

In Ecuador, passenger traffic increased 3.0x YoY. When compared to the same month of 2019, total traffic declined 20.1% in September 2021, showing a strong continued improvement since the 64.8% decline posted in April. International passenger traffic decreased 7.5%, recovering strongly from the 23.6% drop reported in August 2021 against 2019. Domestic passenger traffic, in turn, declined 32.7% against September 2019, also showing a recovery versus the 44.7% decline posted in August.

In Armenia, total passenger traffic increased 4.9x YoY. Compared to September 2019, passenger traffic continued with its positive recovery trend reaching almost 85% of pre-pandemic levels, despite lower tourism activity in the reported month.

Cargo Volume and Aircraft Movements

Cargo volume increased 46.9% YoY. When compared to September 2019, total cargo volume in September 2021 dropped 13.1% improving sequentially from the 20.5% decline in August, mainly driven by decreases in Argentina, Armenia and Brazil. Both, Uruguay and Italy reported higher cargo volume when compared to September 2019.

Aircraft movements increased 109.1% YoY. When compared to September 2019, Aircraft movements declined 32.7%, mainly as a result of a 45.0% decrease in Argentina.

(1) Note that preliminary passenger traffic figures for January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

(1) Note that preliminary passenger traffic figures for January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Operating Statistics by Airport: Traffic, Cargo and Aircraft Movements (2021 vs. 2019)

(1) Note that preliminary passenger traffic figures for 2019, as well as January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.
