Total Aircraft Movements (thousands)	51.0	72.6	-29.7%	386.2	717.9	-46.2%

(1) Note that preliminary passenger traffic figures for 2019, as well as January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January 2019 to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Passenger Traffic Overview

Total passenger traffic in October 2021 grew 2.0x compared to the same period of last year, driven by increases across all countries of operations, particularly in Argentina, reflecting easier comparisons due to tougher travel restrictions in the year ago period. When compared to 2019, overall passenger traffic declined 41.6%, impacted by the COVID-19 pandemic, though consistently improving from the decline of 75.7% recorded in April. International and domestic passenger traffic dropped 57.5% and 34.5%, respectively, from pre-pandemic levels of October 2019.

In **Argentina**, total passenger traffic increased 18.7x YoY. Against October 2019, overall passenger traffic declined 56.2%, with international passenger traffic decreasing 81.5%, impacted by tight government restrictions to international flights, including a limit of 2,300 arriving international passengers per day for most part of the month, while borders remained closed to non-resident foreigners, with limited exceptions. Domestic passenger traffic, which has no restrictions, declined 44.4% compared to 2019, improving sequentially from the decline of 53.4% recorded in September.

In **Italy**, where the recovery continued throughout the year, passenger traffic grew 211.2% YoY. When compared to October 2019, passenger traffic declined 41.1%, improving from the 47.7% drop reported in September, which benefited from the summer season in the region. International passenger traffic continued to improve sequentially, decreasing 46.7% in October 2021 against the same month in 2019, whereas domestic traffic stood at over 80% of pre-pandemic levels.

In **Brazil**, total passenger traffic was up 46.1% YoY. Compared to the same month in 2019, overall passenger traffic declined 20.9%, showing a continued improvement from the 69.1% drop posted in April 2021, reflecting better sanitary conditions in the country, advanced vaccination roll-out and increased passenger demand.

Total passenger traffic in **Uruguay** increased 3.5x YoY. Against October 2019, passenger traffic was down 64.5% but continued to improve sequentially, benefiting from the partial opening of borders, effective September 1. Noteworthy, starting November 1, 2021, borders are fully re-open to all foreigners who present a full vaccination certificate and a negative Covid test.

In **Ecuador**, passenger traffic increased 1.6x YoY. When compared to the same months of 2019, total traffic in October 2021 declined 21.7% showing a strong improvement since the 64.8% decline posted last April. International passenger traffic decreased 18.0%, recovering strongly from the 58.8% drop reported in March 2021 against 2019. Domestic passenger traffic, in turn, declined 26.2% against October 2019, showing a recovery versus the 32.7% decline posted in September.

In **Armenia**, total passenger traffic increased 5.6x YoY. Compared to October 2019, passenger traffic continued with its positive recovery trend reaching almost 90% of pre-pandemic levels, despite lower tourism activity in the reported month.

Cargo Volume and Aircraft Movements

Cargo volume increased 31.5% YoY. When compared to October 2019, total cargo volume dropped 21.4%, mainly driven by decreases in Argentina and Brazil. While cargo volume in Uruguay was almost at the same level than the same month of 2019, Italy reported higher cargo volume during that period.

Aircraft movements increased 100.6% YoY. When compared to October 2019, Aircraft movements declined 29.7%, mainly as a result of a 37.3% decrease in Argentina.

(1) Note that preliminary passenger traffic figures for January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

(1) Note that preliminary passenger traffic figures for January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Operating Statistics by Airport: Traffic, Cargo and Aircraft Movements (2021 vs. 2019)

(1) Note that preliminary passenger traffic figures for 2019, as well as January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.
