(1) Note that preliminary passenger traffic figures for 2019, as well as January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January 2019 to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Passenger Traffic Monthly Performance (vs. 2019)

Passenger Traffic Overview

Total passenger traffic in February 2022 grew 109.0% compared to the same period of last year, driven by increases across all countries of operations, particularly in Argentina, reflecting higher activity and traffic demand following the re-opening of borders on November 1, 2021. When compared to February 2019, overall passenger traffic declined 35.0%, improving from the 37.0% decline posted in January. International and domestic passenger traffic improved sequentially reaching 51.9% and 74.0% of pre-pandemic levels of February 2019, respectively.

In **Argentina**, total passenger traffic increased 1.6x YoY and reached 65.1% of February 2019 levels, with international passenger traffic improving to 42.6% of pre-pandemic levels, showing a continued strong recovery from the 6.2% posted in July 2021, the lowest level of the year. International traffic continued benefiting from the opening of borders on November 1, 2021. Domestic passenger traffic also continued to recover, reaching 78.3% of February 2019 levels.

In **Italy**, where travel restrictions have eased during the last couple of months, passenger traffic grew 12.2x YoY reflecting easier comparisons due to the closure of Florence airport in February and March of last year, to perform runway works. Total traffic reached 58.1% of February 2019 pre-pandemic levels, improving sequentially from the 41.5% posted in January, which was impacted by the Omicron variant.

In **Brazil**, total passenger traffic increased 33.0% YoY, and reached 72.7% of February 2019 levels. This was a strong improvement from the 30.9% posted in April 2021, but a sequential decline from the 81.8% levels achieved in January 2022. This month-over-month decline is mainly attributable to flight cancelations, done by some of the airlines, due to COVID cases within their crew. Domestic traffic stood at over 85.0% of pre-pandemic levels.

Total passenger traffic in **Uruguay** increased 6.0x YoY and reached 48.4% of February 2019 levels. Traffic in Uruguay, continues to improve strongly after the borders were fully re-opened on November 1, 2021.

In **Ecuador**, passenger traffic increased 1.3x YoY, reaching 78.0% of pre-pandemic levels of February 2019, improving strongly from the 35.2% posted in April 2021. International passenger traffic continued to recover reaching 88% of pre-pandemic levels, boosted by routes to the US and Panama which have been seeing higher passenger traffic than in 2019 for some months now. Domestic passenger traffic improved to 69.6% of February 2019 pre-pandemic levels, from the 53.5% posted in January.

In **Armenia**, where the vaccination roll out has improved significantly in the past three to four months, total passenger traffic increased 85.1% YoY. Passenger traffic continued its positive recovery trend surpassing, for the second consecutive month, pre-pandemic levels of 2019.

Cargo Volume and Aircraft Movements

Cargo volume increased 21.1% YoY. When compared to February 2019, total cargo volume dropped 24.8%, mainly driven by decreases of 45.8% in Brazil and 21.9% in Argentina, accounting for over 90% of the reduction. Importantly, Italy, Uruguay and Armenia reported higher cargo volumes compared to pre-pandemic levels of February 2019.

Aircraft movements increased 58.5% YoY. When compared to February 2019, Aircraft movements declined 26.7%, mainly as a result of a 27.3% decrease in Argentina, which explains more than half of the overall drop, together with a 15% decline in Brazil. To note, aircraft movement in Armenia, Ecuador and Uruguay stood at 86.8%, 86.0% and 83.7% of February 2019 levels, respectively.

(1) Note that preliminary passenger traffic figures for January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Total CAAP																		

(1) Note that preliminary passenger traffic figures for January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.

(3) Cargo volumes in Uruguay were rectified from January to June 2020, to reflect all cargo passing through the cargo terminal, instead of air cargo only.

Operating Statistics by Airport: Traffic, Cargo and Aircraft Movements (2022 vs. 2019)

(1) Note that preliminary passenger traffic figures for 2019, as well as January 2020 for Ezeiza Airport, in Argentina, were adjusted to include additional inbound passengers not accounted for in the initial count, for an average of approximately 5% of total passenger traffic at Ezeiza Airport and 1% of total traffic at CAAP, during that period. Importantly, inbound traffic does not affect revenues, as tariffs are applicable on departure passengers.

(2) Preliminary data on 1,256 flights in January 2020 at Brasilia Airport, due to delays in the submission of information by third parties.
